P3 Technologies Welcomes Questor Technology and Indigo Power Systems

P3 Technologies was excited to welcome Audrey Mascarenhas, CEO of Questor Technology, and Dave Huber, President of Indigo Power Systems, for a visit to our facilities in Jupiter, Florida.

P3 is proud to be developing a series of turbine expanders for Questor Technology's family of Organic Rankine Cycle (ORC) Power Generators – providing clean, efficient electricity from waste heat.

The turbine expander utilizes advanced technology fluid-film bearings, seals, and couplings to provide exceptionally long-life and low maintenance. The Questor ORC provides valuable electric power efficiently from otherwise wasted heat. For more information, visit questortech.com.
