P3 Technologies Receives AS9100 Rev D and ISO 9001:2015 Certification

P3 Technologies has recently received certification to ISO 9001:2015 and AS9100 revision D – the globally recognized aerospace quality management standard. The scope of the certification includes Sales, Design, and Manufacturing including machined parts for the aerospace and defense industries.

AS9100 is backed by the International Aerospace Quality Group (IAQG), which includes representatives from major worldwide aerospace companies. AS9100 certification sets the worldwide aerospace quality standards as well as the quality requirements of Department of Defense (DoD), National Aeronautics and Space Administration (NASA), and the Federal Aviation Administration (FAA).

“I am extremely proud of the P3 team for their dedication to quality and continuous improvement. Quality is a critical part of the P3 culture and meeting our customers’ expectations,” said Jessie Pease, P3’s Quality Program Manager. “This is a significant milestone for our business, particularly as we deliver human-rated space hardware,” said Philip Pelfrey, President of P3 Technologies.

P3 Technologies is a turbomachinery and propulsion company in Jupiter, Florida specializing in propulsion, pumps, and power. The company conducts research, development, design, analysis, manufacture, and test of existing, advanced, and emerging propulsion systems including liquid propellant rocket engines of all cycles and propellants.
